A wooden Advent calendar

v16077

Make this wooden Advent calendar for the countdown to Christmas. Paint the wooden trees, birds etc. with craft paint, glue them onto the wooden calendar block and partially cover the base with Sticky Base kneaded with artificial snow.

Comment faire

1 Push out the pre-cut trees, snowflakes and reindeer from the wood veneer sheet. Paint some of the parts with craft paint and leave other parts unpainted.

2 Attach the loose parts onto the wooden block with a glue gun. Hold the parts in place until the glue has set.

3 Partly cover the base with Sticky Base kneaded with artificial snow. Roll the mixture into small strips and place them onto some of the tree branches. You may sprinkle more artificial snow onto the Advent calendar.
