

## Nosy elves from papier-mâché pulp

v15980

Make these nosy elves by covering a papier-mâché cone with paper papier-mâché pulp and then decorating it with craft paint.

### *Comment faire*

**1** Mix papier-mâché pulp with water in a 1:3 ratio.

**2** Cover the papier-mâché cone with the papier-mâché pulp by squeezing it all around the cone.

**3** Press into the pulp to make an edge where you want the hat to start.

**4** Squeeze a small blob of pulp together and roll it lightly to make a round ball for the nose. Attach it onto the wet pulp by pressing it on.

**5** Make texture in the wet pulp using your fingers and/or different kinds of tools. Here we have used a flower stick for adding texture to the beard. Leave to dry for 1-3 days, depending on the thickness of the pulp.

**6** Dab craft paint onto the nosy elf with a foam stencil brush or a sponge and leave to dry.

**7** Paint the nose with red craft paint using a brush.
