

Un porte-clés en macramé en ficelle de coton

v15879

Tressez un porte-clés décoratif en utilisant la technique du macramé. Utilisez une ficelle de coton de 2 mm de diamètre de la couleur de votre choix.

Comment faire

1 Coupez 4 morceaux de 140 cm de ficelle de coton. Doublez-les et passez la boucle de chaque morceau de ficelle doublé par l'avant d'un anneau de porte-clés comme illustré sur la photo. Passez les extrémités de la ficelle dans la boucle et tirez. Répétez cette procédure avec les quatre morceaux de ficelle de coton.

2 Braid loop knots (consists of making two knots; i.e. two windings) from the centre and out and braid alternating from the left and the right. The knots are braided opposite each other. Braid a loop knot with the cords to the left of the centre as shown in the photo.

3 Follow the same procedure, braiding a loop knot with the cords to the right from the centre.

4 Divide the cords on each side. Braid the two middle cords together with a loop knot.

5 Braid with the outer cord on the right around the next three cords from the right towards the centre.

6 Repeat this procedure on the left.

7 Braid the two cords in the middle together (loop knot).

8 Arrange the cords (4 on each side). Braid once again the outer cord on the left around the next three cords towards the centre.

9 Repeat this procedure on the right.

10 Follow this procedure until you have braided 12 rows.

11 Finish the braiding by placing the cord on the far right towards the centre. Braid as before but now gradually over all the cords in the centre. Braid around one cord first, then around two cords (as shown in the photo) and finally braid around three cords so that all four cords end up in the centre. Repeat from the left.

12 Gather the cords and braid four times around all the cords with one of the cords as shown in the photo.

13 Tighten the cord and tie a knot so that the braiding doesn't come undone. Trim the tassels.
