

Des pots décorés avec la technique du dip and dye

v16194

These jars with a rough surface lend themselves really well to glass & porcelain paint mixed with water. Experiment with different colour solutions and make a beautiful and striking jar – a perfect gift idea.

Comment faire

How to do it: Wash the jar well using soapy water prior to immersing it in paint to avoid greasy marks etc. being visible.

4 Dip your jar in the paint solution once or twice.

7 Dip the jar deeper into the paint solution.

10 Paint circles on the lid with the different colour solutions using a soft brush.

2 Pour a blob of your chosen colour glass & porcelain paint in the bottom of a bucket.

5 Place the jar on the two bamboo sticks whilst making the solution thinner.

8 Continue like this until you are satisfied with the number of coats of paint on the jar.

Tip When decorating an empty ceramic jar (i.e. without wax inside), fix the painted jar in the oven once decorated. This makes the paint resistant to drying out. If you choose to decorate a jar with wax inside, then wait to fix the jar until the candle has burned down. You can now use the jar for storing knick knacks. Fix in the oven for 30 minutes at 160°C.

3 Pour a bit of water into the bucket and stir well with two bamboo sticks. Stir until the paint is fully dissolved.

6 Pour more water into the bucket and stir well.

9 Leave the jar to dry for a while. You may now decorate the jar further with Pintor markers.
