

Farverige musemåtter og kop coolers med fingertryk

v16208

Lav flotte og sjove musemåtter og kop coolers med silkemaling, effektsalt og sjove tryk lavet med fingre og hænder. En sjov og praktisk gaveidé der sætter gang i børnenes kreativitet og fantasi!

Comment faire

How to do it: Apply water to the fabric surface of the mouse mat using a brush.

4 Brush off the silk salt.

7 Use a plastic lid dabbed with Textile Solid paint (on the rim) to make bubbles.

2 Brush Textil Silk paint onto the surface – either pure or diluted with water. Experiment with both options, causing the surface to change in colour.

5 Dab Textile Solid paint onto your hands or fingers and print fun designs onto the mouse mat. Leave to dry.

8 Add further details with textile markers.

3 Sprinkle silk salt onto the wet Textil Silk paint and leave to dry.

6 Use paint and a foam pencil brush for the eyes. Leave to dry.

A tip You may draw sketches of possible designs first. What can handprints and fingerprints be transformed into? The fish are made with a thumb print and the tails with fingerprints.
