

Impression sur textile avec des tampons DIY

v16135

Créez vos propres tampons à partir de caoutchouc mousse et tamponnez des motifs sur une housse de coussin en utilisant de la peinture acrylique et du médium pour textile.

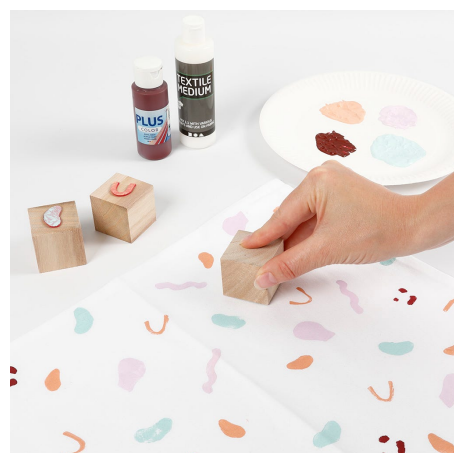

Comment faire

1 Print the PDF file for this idea which is available below. Cut out the shapes from self-adhesive foam rubber or use your imagination for your own shapes.

2 Attach the shapes to wooden blocks.

3 Mix craft paint and Textile Medium in the ratio 1:1 and stamp onto the cushion cover. Use this mixture as it makes the colour last when washing once fixed with an iron. You may place a piece of paper inside the the cushion cover to avoid the paint smudge onto the back.

4 Fix the paint with a warm iron set on medium temperature. The cushion cover is now washable in a washing machine at 40°C.
