

Vases d'argile auto-durcissante

v11311

Voici de jolis vases décoratifs faits d'argile auto durcissante avec des motifs emboutis. Les tubes à essai sont décorés avec de la ficelle de lin. Des coquillages peuvent être ajoutés.

Comment faire

1 Make a template from an ordinary drinking glass. Add approx. 1cm to the length for the closing.

2 Roll clay into the appropriate thickness and cut out using the template.

3 Make your chosen pattern in the clay with the stamps.

4 Lubricate the glass with cooking oil and put the clay around the glass.

5 Seal the joint.

6 Carefully remove the clay vase from the glass.

7 Let the vase dry for a minimum of 24 hours.

8 Tie flax twine around the test tubes.

9 Arrange the test tubes randomly in the vase.

10 The icon is made with a stamped design, varnished in a few places and decorated with flax twine and beach shells.
