

## Triangular Cones

v11265

These lovely cones are folded from Vivi Gade Origami Paper.

### *Comment faire*

#### Folding Technique for Cones -

- 2** 1. Cut the paper or card into a square. Fold the square diagonally and unfold. 2. Fold to the diagonal line from both sides. 3. Fold the top triangle down and up again. Fold the triangle backwards on the other side. 4. Assemble the cone. Let the outer triangle on one side go over the outer triangle in the other side. Glue the cone together and glue on a handle.
