## A portrait from papier-mâché pulp in a collage frame

v11248

Beautiful self portraits from papier-mâché pulp inserted into primed collage frames and painted with Pigment acrylic paint.

### *Comment faire*

**1** Prime the collage frame with Super Gesso primer. Then paint the collage frame with Pigment acrylic paint.

**2** Mix the papier-mâché according to the recipe, model the portrait in the papier-mâché and let it dry. Wait at least 5 days before it is completely dry. If the papier-mâché releases the frame, glue it into place with a glue gun before painting.
