

Alien Love

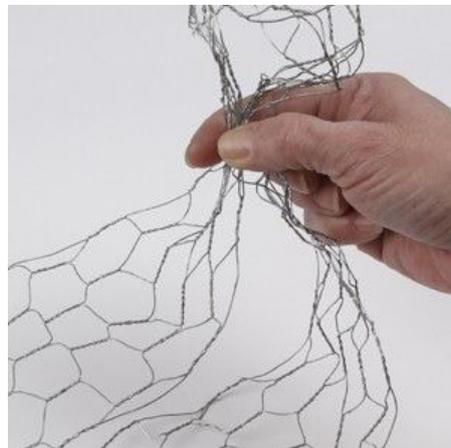

v1124

These figures are formed from Wire Netting and covered with Papier-Mâché. Painted with A-Color Metallic Paint.

Comment faire

1 Mix Dana Wallpaper Paste following the instructions and tear newspaper strips.

2 Form the Wire Netting into the desired figure.

3 Brush the Wallpaper Paste onto the newspaper strips and attach them to the figure – layer upon layer. When the entire figure is covered with a generous layer of newspaper, leave it to dry.

4 Paint the figure – let it dry. Paint the circles where you want the eyes to be in a contrasting colour.

5 With the same colour as used for the eyes put a very thin layer of paint on your finger and rub the “bumps” on the figure.

6 Paint the wood beads as eyes. Glue them on with a glue gun.

7 Paint and decorate the figure according to your imagination. Use 3D-Liner for details. Finally varnish the figure preferably several times for a deeper shine.
