

Masques de New York

v11202

Tracez des lignes simples avec un marqueur permanent épais. Puis appliquez la peinture Aquarelle Art Aqua Pigment avec un pinceau doux à poils en nylon et de l'eau.

Comment faire

Step 1. The exciting plastic masks with a velvet surface are inspired by the street art in New York. Only three colors have been used; yellow, turquoise and pink which can be used as primary colors and are incredibly beautiful when mixed. To get the color to run on the surface and spread, add a little water continuously with the brush onto the mask surface. Have a cup of water for each color, as even highly diluted Art Aqua watercolor is beautiful against the stronger undiluted colors. The permanent marker works like a "stopper", which allows you to control the color.
