

Memory wire bracelet

v11193

Attach beads in different sizes onto memory wire. Decorate with pendants a few places on the bracelet and at each end.

Comment faire

1 Cut three rounds of memory wire.

2 Make a loop in one end with round nose pliers.

3 Pull on beads in the desired order.

4 Finish off by making another loop.

5 Make pendants like this: Put a head pin through a bead and bend the pin towards you.

6 Turn the pin around the pliers as shown.

7 Turn the pin around three times as shown and cut off the excess pin.

8 Attach a round jump ring in the pendant and attach it in the loop at the end of the bracelet.

9 If you wish, you can attach more pendants by attaching a round jump ring onto the memory wire itself and then attach a pendant to the round jump ring.
