

Zebra bird in self-hardening clay

v11176

Gorgeous solid clay birds, easy to sculpt in self-hardening clay layered in colours.

Comment faire

1. Roll six white and six black sausages in self-hardening clay. Put them next to each other and with a roller roll them flat so that they become one big square.

2. Put the layers together gently and shape the bird, when you think the stripes are right. Wipe off the wet clay so the stripes are clean.
