

## Sun top

v11161

Sun and summer and cheerful colours are combined in this sun top which is for everyone to make. It is tie-dyed in a tub. A design is drawn on using a fabric marker.

### *Comment faire*

**1.** The top is washed at 40 degrees in the machine before dyeing. Fold the top in pleats and tie with cotton yarn (which is wrapped tightly around several times).

**2.** For this top we have used approx. 3.5 liters of water heated to 30-60 degrees in which 350g fine salt is dissolved. Normally, use 1 kg salt to 10 liters of water.

**3.** Add the colour. Here we have used approx. 35ml of ES Batik. Normally, use 100ml to 10 liters of water.

**4.** Dissolve approx. 70g medium fix in a little water. Normally, use 200g to 10 liters of water. Pour into the dye bath and mix.

**5.** Wet the fabric and put it into the dye bath for 30 min. It should float freely. Stir frequently.

**6.** Pour out the coloured water and rinse the top.

**7.** Cut off the cotton yarn.

**8.** Rinse the top until the water is clean and then wash it in the washing machine at 60 degrees.

**9.** Draw some palm trees with a fabric marker (remember plastic or something hard between the layers). Draw slowly and do not pull the fabric with the fabric marker.

**10.** Sew on small rocaille beads on the neckline and straps.
