

Little flat nosed angel

v11109

Cute angels made in self hardening clay with relief pattern created with imprints of laces in the clay.

Comment faire

1 Form a head. Roll two oval clay pieces flat with a clay rolling pin and press a lace border into the wet clay.

2 Press the three parts together gently so that one oval becomes the body and the other the wings. Make a hole for hanging. Let it dry.

3 Paint with acrylic painting varnish on all surfaces without a lace pattern. Let them dry between applications. Apply preferably 3-5 layers of varnish. Attach a cord for hanging.
