

Funny woollen monsters

v11462

Needle Felting with carded wool is becoming a classic activity for both children and adults. Here, we have moved into a universe of fun fantasy creatures that can challenge children's sense of humor, imagination and motor skills. The fine details will depend on the child's age and ability. The longer you felt with the felting needle, the firmer the figure becomes. You can use them as a hanging decoration, a pendant, on the refrigerator door with a magnet, a fun badge, with a brooch needle on the back or as a gift for mum and dad for hanging in car ... the possibilities are endless. The only tool needed is a needle felting foam pad, and carded wool in bright colors. Enjoy.

Comment faire

1 Fold a wad of wool into a ball and felt with the felting needle. Continue to add more wool all the way around until the ball has the desired size. Remember to use the needle felting foam pad.

2 Felt an opening by stabbing the felting needle repeatedly to make the mouth.

3 Fold a small wad of wool to make the foot and felt it.

4 Felt where you want the wool to make the toes.

5 For the horn fold a small amount of wool and felt whilst turning.

6 Take a small piece of white wool for the eyes. Fold the edges towards the middle and felt. Felt two of the eyes a little flat and the other three a little round.

7 Felt the eyes onto the horn.

8 Felt the feet onto the body from underneath.

9 Felt all the parts onto the body.

10 This is how a monster could look, but use your imagination.
