

## Trivet in felt

v11317

A decorative felt trivet with cut-out "stones" tied with embroidery floss.

### *Comment faire*

**1** Cut a small random stone shape from 5mm acrylic felt. Cut about 30-40 rounded "stones" out of felt in other colours. Cut rounded edges so that the felt resembles flat stones.

**2** Arrange the stones to fit along the edge and match the colours. Use a threaded needle to stitch into the front and back, then tie a knot in the front. The trivet can withstand normal use but not very hot grill pans or frying pans.
