

Wax and Seal

v11822

Wax is melted and dripped down onto the envelope. The seal is immediately pushed into the warm wax.

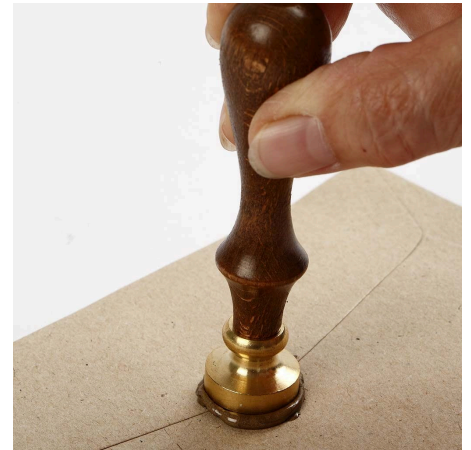

Comment faire

1 Pour lamp oil into the small 'oil lamp'. The wick must be flush with the metal top and not protrude over. Hold the wax in the flame.

2 Dab the melted drops off onto the envelope.

3 When there is enough wax on the envelope, immediately push the seal into the warm wax.

4 - and the wax has set.
