

## Book Marks with Book Cover Foil

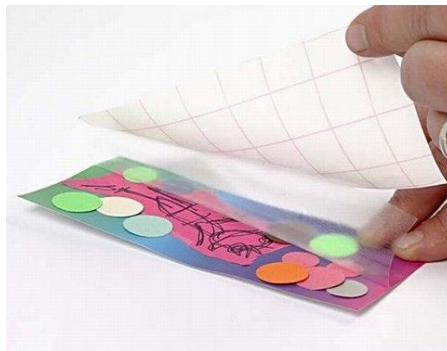

v11793

Bookmarks cut in rainbow paper and decorated with a drawing on coloured paper and card mosaic. Everything is glued on with a glue stick and finally placed between two layers of self-adhesive book cover foil.

### *Comment faire*

**1** First let the child draw and then tear along the edge of the paper. It may be a challenge for the child not to tear the drawing ... and if it did happen, this would be an amusing detail on the book mark. Now decorate with paper mosaic.

**2** Book cover foil is easily attached.
