

## Felt Cases for Glasses and Mobile Phones

v11790

Felt is cut and sewn with mercerised cotton yarn to make small cases. The decoration is either needle felted or cut in felt which is then sewn or glued onto the case using textile glue.

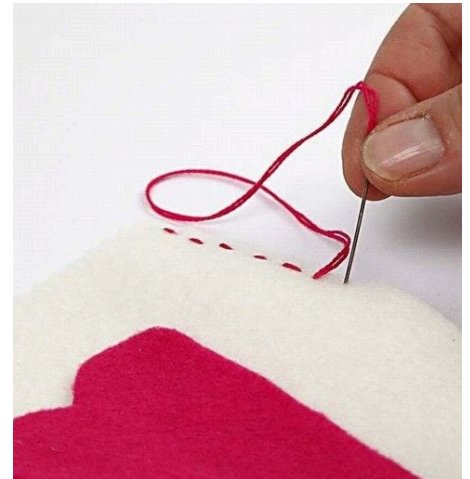

### *Comment faire*

**1** Needle felting. Place some wool on top of a square piece of felt and felt using the felting needle – up and down. Don't forget your needle felting foam pad.

**2** A piece of felt. Cut designs from felt and glue them onto a square piece of felt using textile glue.

**3** Sew the sides and – if you wish – the decoration using mercerised cotton yarn. Choose either tacking stitches or buttonhole stitches.
