

Hearts made from Self-Hardening Clay

v11748

Roll out self-hardening clay thinly. Cut out the hearts with heart shape cutters. Dry and varnish with acrylic lacquer.

Comment faire

1. Roll out the clay in approx. 2mm thickness.

2. Let them dry for approx. 24 hours and – if necessary - gently sand them along the edges using a sanding sponge.

3. Let them dry for approx. 24 hours and – if necessary - gently sand them along the edges using a sanding sponge.

4. Varnish both sides and let it dry.

5. Cut a piece of natural twine to your desired length and tie around the heart.
