

Paverpol Chicken

v11704

A skeleton made from Wire Netting and covered with strips of Gauze Bandage soaked thoroughly in Paverpol. When dry the figures are painted with Pigment Acrylic Paint.

Comment faire

1. Cut a 70cm long piece of wire netting. Bend and fold the wire netting to form a bird shape. Fasten the wire netting securely.

2. Tear the Gauze Bandage into pieces/strips. Soak in Paverpol and wind around the wire netting shape. Cover completely and let it dry.

3. When dry paint the figure with Pigment Acrylic Paint.
