Scary Window Decorations

v12013

Window Color is painted and traced on transparent hard foil using templates. When dry, cut out the shapes and hang them in a piece of elastic cord.
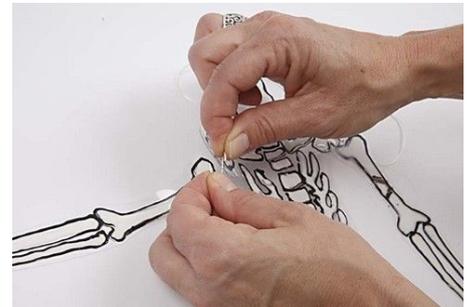

Comment faire

1 Trace with black Window Color outliner on a piece of transparent hard foil ... you may use the template.

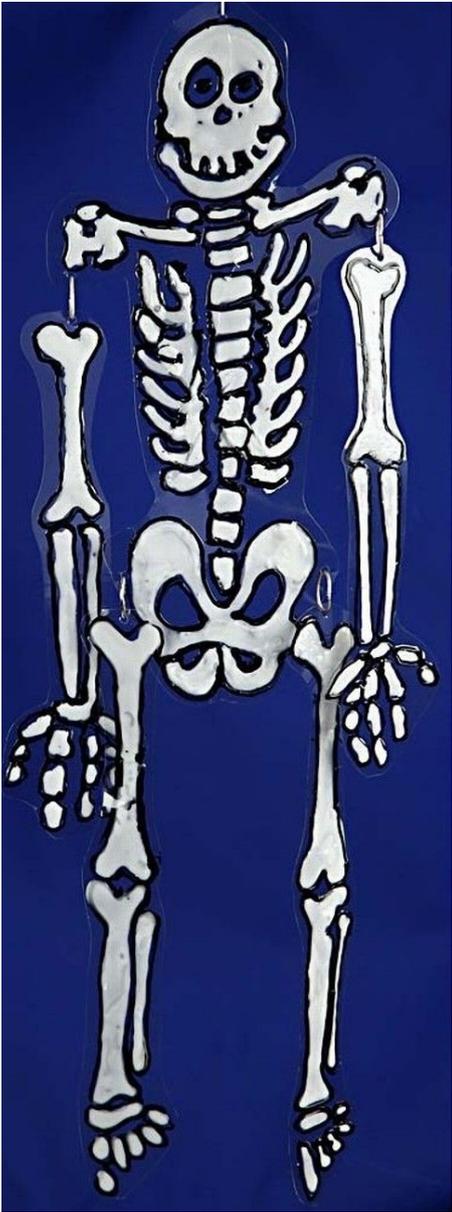

2 Fill in with Window Color when the outliner is dry. NB: put beetles and spiders and other creepy crawlies in the wet Window Color.

3 Cut out along the decoration and assemble the skeleton parts with round jump rings.
