

Paper and Decorations

v11983

These polystyrene balls are painted with Plus Color and decorated with small pieces of paper and punched out flowers attached with straight pins and gold wax beads.

Comment faire

1 Paint a polystyrene ball and let it dry.

2 Tear a piece of paper into small pieces.

3 Attach the pieces of paper onto the ball with straight pins decorated with a small wax bead. If covering the ball entirely with pieces of paper, you do not need to paint the ball. NB! A polystyrene ball decorated with punched out flowers also looks great.
