

Plastic Beads on Metal Hair Clips

v11919

It is easy to make hair accessories with plastic beads, elastic beading cord or coloured elastic cord. After threading the beads onto the elastic cord, finish with a knot in the hole of the metal hair clips.

Comment faire

1 Thread the beads onto an elastic cord using a large cross stitch needle.

2 Thread the beads onto coloured elastic cord with the brilliant beading needle which is also suitable for small beads. Separate the needle in two and thread the elastic cord through. The needle will fold around the elastic cord.

3 When the beads are on the cord, you may finish by tying the final knot through the hole in the metal hair clips. You have now made lovely hair accessories.
