

Sculpture Houses

v12311

Houses have been moulded using shape cutters which are pressed into a layer of sand on an paint tray. Stone and glass mosaic have been pushed into the sand and finally the casting compound is poured into the mould.

Comment faire

1. Sand is poured into a flat layer in the paint tray.

2. Place stones, sticks or mosaic in the tray and press down lightly into the sand.

3. Grease the mould with a little cooking oil and press it down lightly over the stones.

4. Mix the casting compound following the instructions on the packaging and pour it carefully into the mould. Dry for approximately 30 minutes.

5. Gently press out the shape. Paint the edges with diluted Plus Color Craft paint.
