

## A Star for Hanging

v12216

Made from the jewellery kit including instructions

### *Comment faire*

**1.** Cut a piece of bonsai wire measuring 30cm and thread twelve beads onto the wire. Feed the wire through the first bead. One end of the wire should be approx. 5cm long. Twist the short end a couple of times to lock it.

**2.** Thread three beads onto the long wire and feed the wire through No. 2 bead.

**3.** Thread another bead onto the wire and feed the wire through the next bead of the original bead circle. Continue like this until five points are made.

**4.** Finally thread another three beads onto the wire and make a loop around a small stick. Cut off the excess wires.
