

A Stained Wooden Piggy Bank

v12180

Lovely wood articles painted with Plus Color Craft Paint. The stained look is achieved by diluting the paint with lots of water.

Comment faire

1 Dilute Plus Color with water and massage the paint into the water with a brush. This method ensures that the wood grain is still visible. Use lots of water.

2 Finally varnish the wood articles with an acrylic lacquer as well as the lids for the boxes.
