

Jewellery with Memory Wire

v12560

Jewellery made on memory wire. Beads are threaded onto the wire which is closed in both sides with glued on memory wire end caps.

Comment faire

1. Close off one end of the wire by glueing a memory wire end cap in place using Super Attak brush-on instant glue.

2. Thread the beads onto the memory wire. Be careful not to pull the wire out of shape.

3. When the entire wire is filled with beads, lock it by glueing on another memory wire end cap.

4 More variants.
