

Stamp Printing on Archive Boxes

v12353

Simple decorations with a Fiskars Stamping Wheel. The ink is applied automatically enabling printing in an continuous row for as long as you choose.

Comment faire

1. Remove the protective sheets from the stamp design.

2. Attach the silicone stamp to the roller. Open the roller by pulling out the two orange pins.

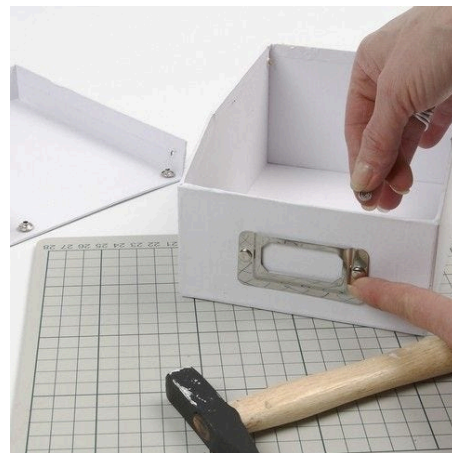

3. Push the ink pad in place at the top of the holder into the two grooves and turn it down towards the stamping roller.

4. Cut out the flower with the shape cutter.

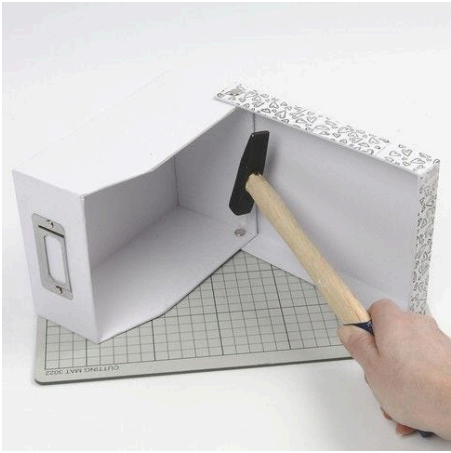

5. Apply the stamp to the edges of the lid. Put the piece of paper with the cut out flower onto the lid of the box and roll the stamp across.

6. Attach the metal frames using the small brads. Use a hammer for securing the back of the brad onto the box.

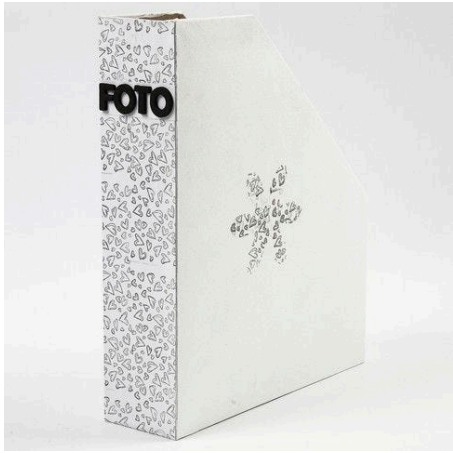

7. Use the large brads for attaching the lid onto the box.

8. Boxes.

9. The magazine box is painted with white Plus Color using a paint roller and then stamped.

10. A card and an envelope with a simple stamped design.
