

Embossed Greeting Cards with an Abrasive Look

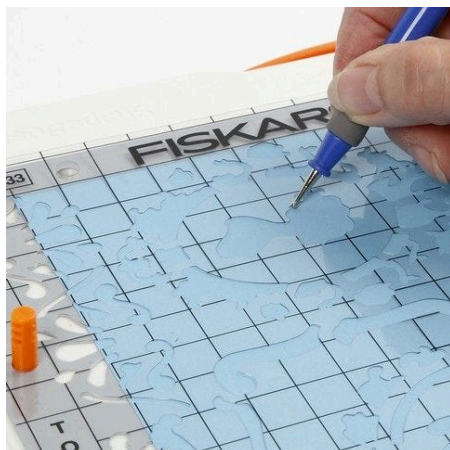

v12789

Use the Fiskars ShapeBoss embossing system for embossing a design into Color Bar paper and then sanding it. The embossed Color Bar paper is attached to a greeting card and decorated with a Pearl Pen.

Comment faire

1. Attach the double embossing stencil onto the Fiskars ShapeBoss embossing system. Place the Color Bar paper between the two layers.

2. Now use an embossing stylus to "draw" inside the holes of the embossing stencil. Let the fine tip of the stylus follow the shapes of the holes along the edges.

3. Use a fine grain sanding sponge on the embossed design – sand lightly making the embossing appear slightly white.

4. Attach the Color Bar paper with the embossed design onto the greeting card using double-sided adhesive tape.

5. Use a Pearl Pen to decorate the greeting card.
