

Polystyrene Stars and Hearts

v12746

Smear modelling past onto polystyrene balls. Then decorate with A-color metallic paint and glitter. Adding a tinsel tassel with decorative beads gives it that finishing touch.

Comment faire

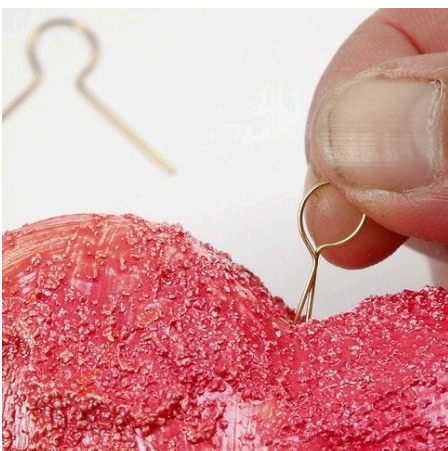

1 Put the polystyrene shape on a stick and apply coarse modelling paste. Leave to dry.

2 Paint with A-color metallic paint. Sprinkle glitter over the wet paint. Leave to dry.

3 Cut a piece of tinsel and bunch together with some floral wire. Thread beads, if using, onto the wire. Use a glue gun or stick the wire into the shape to secure in place.

4 Stick a metal hanger into the shape. Thread through ribbon/string and add beads.

5 An alternative design.
