

## Jewellery School. Friendship Bracelets

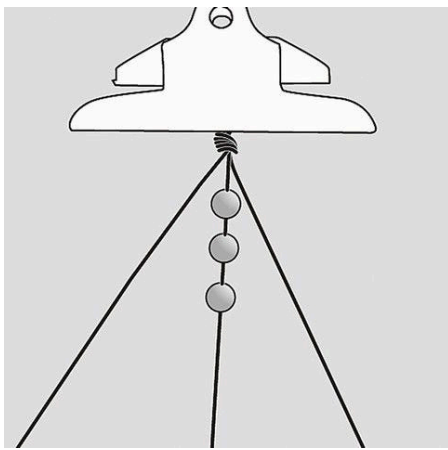

v12724

The technique is very simple and only requires that you can make a 'forward 4-shape knot'. You can use different kinds of cords and beads, but make sure that the cord fits the size of the bead.

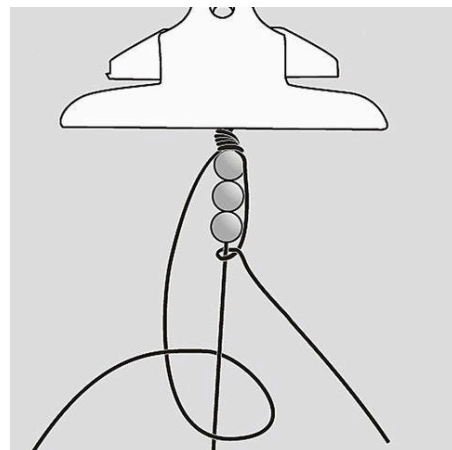

### *Comment faire*

**1.** Cut a 100cm piece and a 40cm piece of your chosen cord (the more braiding and the less beads, the longer the pieces of cord). Double over the long piece of cord. Make a loop at one end of the small piece of cord. Join the cords with a knot, leaving a small loop. Cut off the short end.

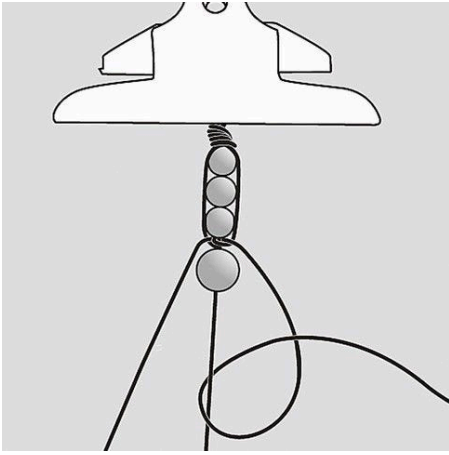

**2.** Put beads onto the middle cord (i.e. the shortest cord).

**3.** Put the right hand side cord over the middle cord, back under and up. Pull the cord up through the loop and tighten it whilst keeping the middle cord taut.

**4.** Repeat with the left hand side cord following the same procedure.
