

A Finger Ring with a Rose

v12719

A quick and easy idea for a finger ring. A freshwater pearl, a metal rose and a bead cap are “sewn” onto a metal ring base with a sieve disc using a thin piece of silver-plated wire.

Comment faire

1. Push to flatten a bead cap using your finger.

2. Thread a 0.3mm piece of silver-plated wire through all the parts: the metal ring with a sieve disc, the bead cap, the metal rose and the freshwater pearl.

3. Now thread the wire back again through the sieve disc on the ring, twist the wire ends and hide them between the two discs on the ring.
