

## Clay Birds

v12679

Self-hardening clay is rolled out flat with a rolling pin, punched out with shape cutters and with a pattern made with the indentation of a lace border.

### *Comment faire*

**1.** Roll out the self-hardening clay with the rolling pin.

**2.** Place the lace border on the rolled out clay and roll on top of the lace border into the clay with the rolling pin. Then remove the lace border.

**3.** Punch out the shapes with a shape cutter.

**4.** Make a hole through the bird's wings using a needle.

**5.** Varnish the pigeon and insert a piece of string for hanging.
