

Stud Earrings with Jewellery Chain and a Flower

v12607

A thin metal chain is attached to stud earrings with a flat pad. Clay roses are glued onto the flat pad of the stud earrings.

Comment faire

1. Cut a piece of jewellery chain measuring approx. 6.2cm. Use a small round jump ring to connect the chain with the butterfly back (the stopper).

2. Put the last link of the other end of the chain onto the earring's pointed stud and glue it onto the flat pad.

3. Glue the clay rose onto the front of the flat pad.
