

Wild Animals from Self-Hardening Clay and Screws

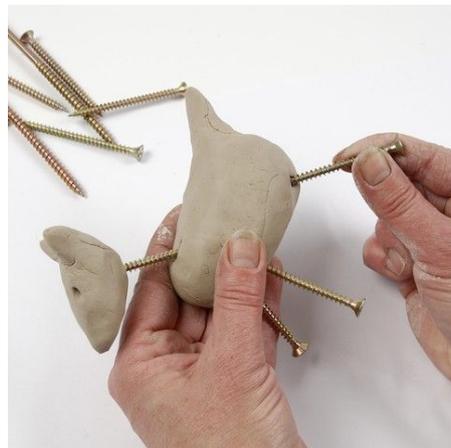

v13012

These wild animals are formed from self-hardening clay in different colours with legs and neck made from large screws. Stripes and dots may either be painted or modelled onto the clay depending on the age of the child.

Comment faire

1. Model an animal body from self-hardening clay.

2. Push large screws into the body for legs and a neck.

3. Dots, stripes etc. may either be painted or modelled onto the animal by using a small amount of water. Let it dry.
