

Animals and People made from Strips of Wood

v13006

Strips of wood and flower strick are cut into smaller pieces using a veneer saw and mitre box. The wooden parts are glued together using a glue gun and then painted with A-Color matt paint.

6+

Comment faire

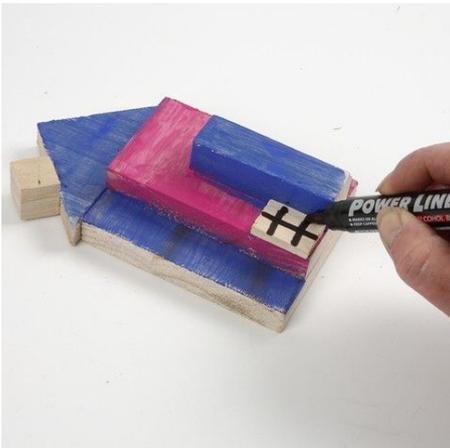

1 Cut blocks and triangles etc. from wood using a veneer saw and mitre box. NB! You may use a mitre cutter for cutting thin strips of wood.

2 Glue the wooden parts together using Dana super hobby glue - or a glue gun which speeds up the drying process.

3 Paint the figures in different colours using A-Color matt paint.

4 Use a power liner permanent marker for faces, windows and other details.
