

Un mobile fait en papier cartonné et en papier fait main

v12973

Les formes sont découpées dans du papier cartonné et du papier fait main. Elles sont ensuite collées ensemble par paires autour d'un ruban, lequel est attaché à un système de suspension métallique.

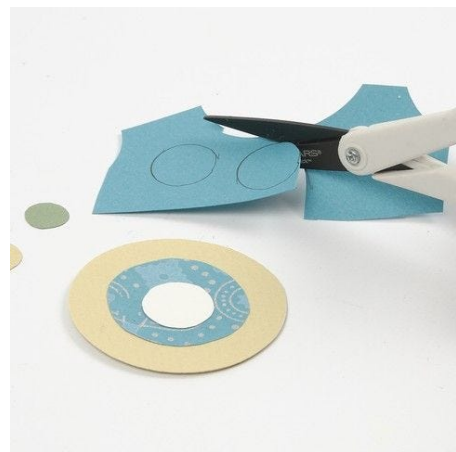

Comment faire

1. Cut pairs of circles with a diameter of approx. 4.5 – 6cm from French card. You may use a compass circle cutter. Cut pairs of circles from handmade paper – but in a smaller size.

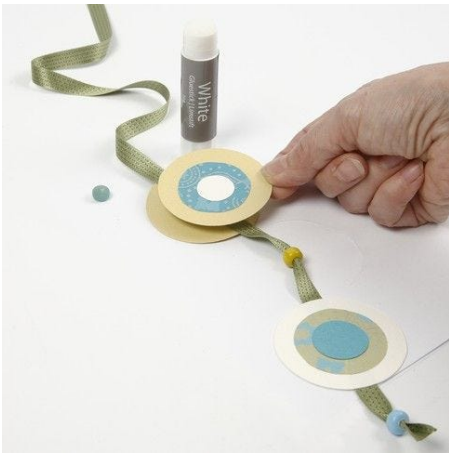

2. Using a glue stick, glue the small card circles onto the large card circles.

3. Make even smaller circles from card by using the lid of the glue stick as a template.

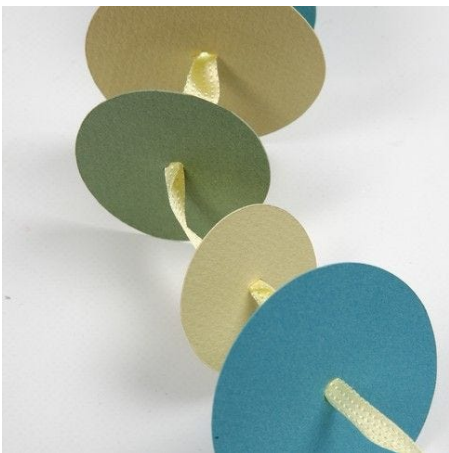

4. Using glue attach the composite circles back to back around a ribbon. Thread a glass bead onto the ribbon between each pair of circles.

5. Use the template for drawing the birds and eggs and cut these out in pairs from handmade paper.

6. Glue a ribbon across some of the eggs. Glue a separately tied bow onto the ribbon.

7. The four ribbons of the mobile are all different. This ribbon consists of circles. The circles are threaded onto the ribbon using a large needle.

8. Thread the ribbons through each loop on the metal hanging devise. Trim and glue together.
