

## A Party Invitation and Card with a Wooden Heart

v12939

This card series is made by attaching the following parts onto a blank greeting card: paper and card from the Color Bar series, as well as a text printed onto party card. Then decorate the card with a wooden heart and a piece of natural hemp.

### *Comment faire*

**1.** Cut the card and paper to size (slightly smaller than the front of the greeting card) and attach using double-sided adhesive tape.

**2.** Tie a piece of natural hemp through the hole at the top of the wooden heart and attach this onto the front of the greeting card.

**3.** Print a text onto a piece of party card. Use the template heart when cutting out the text in a heart shape.

**4.** Attach the heart with the text onto the wooden heart using double-sided adhesive tape.

**5.** Make a hole with hole punch pliers and tie a piece of natural hemp through the hole.

**6.** Menu card: Cut a piece of card measuring 28 x 9cm. Score across the middle with a bone folder and fold to make it a double-sided card. Attach the dotted paper, the printed menu and the heart which is cut out from Vivi Gade Design paper (the Skage series).

**7.** Table decoration: Cut out a heart from Vivi Gade Design paper (the Skagen series) and soften it in warm water making it easy to lie flat and smooth. Decoupage it onto a fabric heart using decoupage lacquer for fabric.
