

A Picture on a Canvas Panel with Structure Paste

v12894

This picture is made with structure paste which is applied onto a canvas panel and scratched with a stick. A motif is painted using A-Color Glass and a black permanent marker is used for outlining the motif.

Comment faire

1. Apply fine structure paste onto the canvas panel. Either fill in the entire canvas panel completely and scratch into the paste – or apply small blobs of structure paste.

2. Paint onto the structure paste with A-Color Glass and water to making the paint run together beautifully. You may sprinkle some transparent glitter in the wet paint.

3. When the paint and the structure paste is dry, outline the motif using a black permanent marker.

4. Attach the finished picture in a wooden frame which has already been painted with A-Color Glass or Plus Color craft paint. Attach the canvas panel in the wooden frame using a glue gun.
