

A Bracelet with Buffalo Horn

v12855

Wooden beads and a buffalo horn bead are threaded onto a piece of black elastic cord using a simple weaving technique.

Comment faire

1. Cut an approx. 140cm long piece of black elastic cord. Double over the piece of elastic cord and thread it through a beading needle.

2. Weave with black beads on either side of the large bead. Use the technique shown.

3. When the size is right and the pattern fits, tie the cord ends in pairs with two tight knots.

4. Secure the ends through one or two beads – and cut off the end.
