

Fantômes faits avec du film réfléchissant à repasser

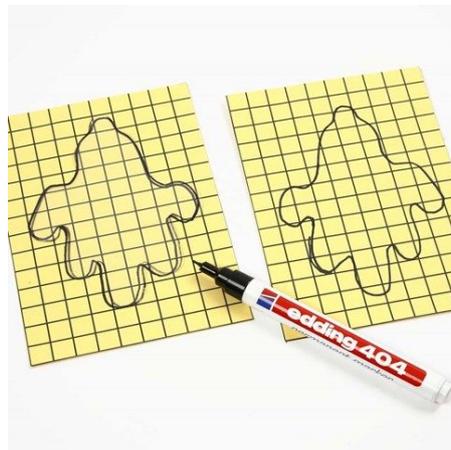

v13292

Les fantômes sont fabriqués avec du film réfléchissant à repasser fixé avec des feuilles adhésives double-face sur un film dur et épais. Faites un trou sur le haut. Un morceau de ficelle de coton avec un fermoir mousqueton est enfilé dans le trou. Maintenant le fantôme réfléchissant peut être attaché à des sacs.

Comment faire

1. Print the template, which is available as a separate PDF file for this idea. Copy the shape onto a sheet of hard foil using a black marker and cut them out.

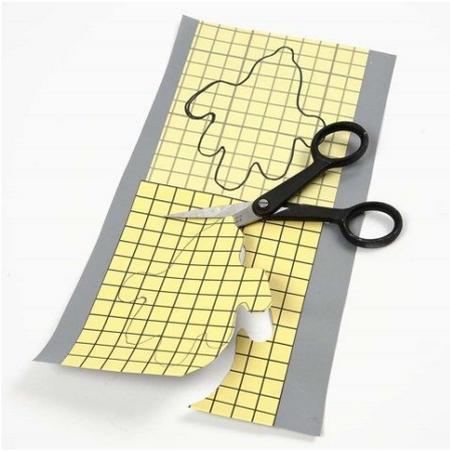

2. Now copy each shape onto a piece of double-sided foil tape. Two of each, one being mirror-imaged.

3. Peel off the protective plastic from the iron-on reflective film. NB: this is on the shiny side.

4. Attach the paired shapes of the double-sided foil tape onto the back of the iron-on reflective film and cut out.

5. Attach the iron-on reflective film onto each side of the hard foil shapes using the cut-out double-sided foil tape.

6. Trim the edges around each ghost and make a hole at the top of each of them using revolving punch pliers. Draw facial expressions with a black permanent marker.

7. Attach a swivel clasp to a piece of cotton cord. Insert the opposite end of the piece of cotton cord through the hole made in the ghost. The finished ghost reflector can be attached to a bag or similar.
