# Polystyrene Christmas Decorations with Foam Clay and Faceted Beads

v13384

The tree and the heart polystyrene hanging decorations are covered with Foam Clay. Both are decorated with rhinestones. A piece of floral wire with faceted beads is attached to the top for hanging.

## Comment faire

**1.** Cover the polystyrene item with Foam Clay. Roll small balls and spread them evenly, gently pushing them onto the polystyrene item until completely covered.

**2.** Push rhinestones onto small Foam Clay balls in different colours. Attach these immediately onto the polystyrene item with slight pressure. NB: make some even smaller Foam Clay balls and push them onto the polystyrene item without the rhinestones.

**3.** Hanging: Double over a piece of green floral wire measuring approx. 8cm. Thread faceted beads onto the floral wire and push the ends into the top of the polystyrene item.
