A Giraffe folded from Origami Paper
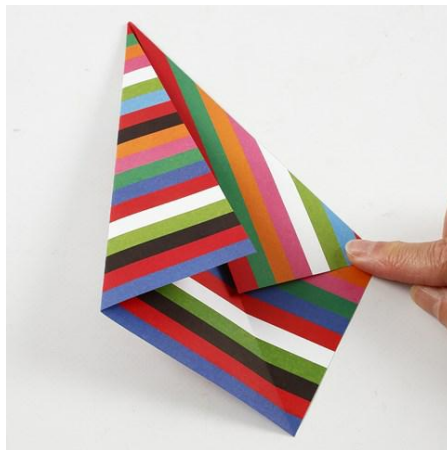

v13770

This giraffe is folded from a square piece of origami paper, following the Japanese folding technique of origami.

Comment faire

**1.** Fold the paper diagonally. Unfold.

2. Fold two sides towards the scored line in the middle, resulting in a very long pointed triangle at the top.

3. Fold the long triangle in the middle and make a bend for the giraffe's neck as shown.
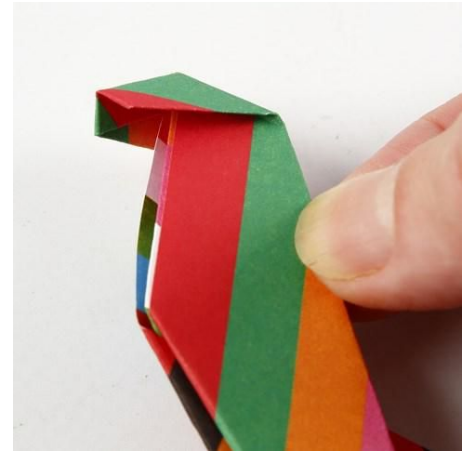

4. Unfold the neck, open and fold the neck inside out on both sides of the body.

5. Fold the top of the neck to form the giraffe's head. Unfold and turn over. Open the neck and fold the head down on both sides of the neck.

6. Bend the pointed tip inwards.

7. Bend the right side tip towards the left so it is aligned horizontally as shown. Open and push the tip inside the body of the giraffe.

8. Pull out the paper tip from between the layers to form a tail.

9. Make two vertical cuts to make the legs and cut across for the stomach.
