

An Advent Wreath with Tassels and Metal Tags with Numbers

v13691

This advent wreath is made from natural branches. It is decorated with small wooden discs which are glued on randomly. Metal tags with numbers and natural hemp tassels are tied around the four candle holders.

Comment faire

1. Glue the small wooden discs randomly onto the wreath, using a glue gun.

2. A tassel: wind a piece of natural hemp around four fingers 12-18 times - or as many times as you like. Tie a piece of natural hemp around the winding at the top and tie a tight knot. Cut open the tassel at the bottom. Use a new piece of natural hemp for making a new winding around the tassel, approx. 1.5cm from the top. Make a total of four tassels.

3. Use a glue gun to attach the candle holders onto the wreath. Tie the four tassels and the four metal tags onto the candle holders with a piece of natural hemp before attaching the candle holders onto the wreath. One of each on each candle holder.
