

## Cute decorations on porcelain

v1409

### *Comment faire*

**1**

Cover the parts of the porcelain you don't want painted, make a fun sketch on a piece of paper before you start.

Now paint with all the thicknesses of the marker and the great effect shows when cover the entire painting area.

When the paint is dry, after approx 15 min. you can scratch a pattern with a sharp stick and create further effects. The border can be cleansed with a moist cotton bud.

Let the porcelain dry for 24 hours before hardening it in the oven..

All the mugs are delivered in a white cardboard box, decorate it in the same style as your mug.
