

Finger Paint on a Bird for Assembly

v13895

These punched-out card birds are decorated with finger paint before assembly. When dry, the body and the wings are assembled with glue. Wiggle eyes are attached as well as a piece of string for hanging.

Comment faire

1. Paint the bird and the wings on both sides with finger paint using your fingers. Leave to dry once one side has been painted before painting the other side.

2. Attach the wings on each side of the bird. Make a narrow bend on one end of the wing, so that it sticks to the bird when glued on. Leave to dry.

3. Glue a wiggle eye onto each side of the bird's head and attach a string for hanging.
