

Framed Chestnuts

v904

Pipe cleaners inserted into the chestnut as arms, legs and hair. Leaves from outside decorated with tissue paper.

Comment faire

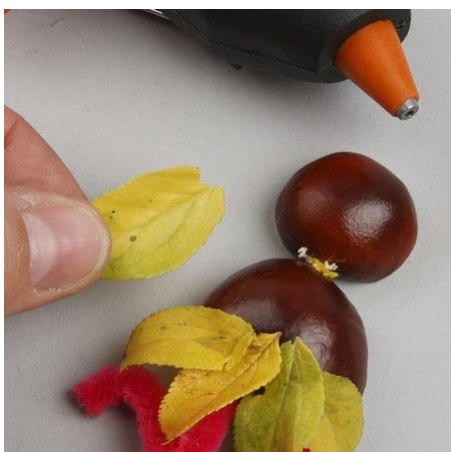

1 Tear the tissue paper into small pieces and glue them onto the glass plate with decoupage lacquer.

2 Make holes in the chestnuts with awl.

3 Cut the pipe cleaners to make arms and legs and glue them into the holes using a glue gun.

4 Decorate the model with decorative items such as leaves.

5 Glue on wiggle eyes with a glue gun.

6 Finally, decorate the model, glass and frame with Poster Hobby Marker (paint on the inside of the glass).

Great tip! Choose small, flat chestnuts to put inside the frame – otherwise the frame cannot be closed. But you could also gently cut away a bit of the back of the chestnut to fit, but don't forget to dry it a bit before, as the moisture from the chopped chestnuts else can form some condensation. Put the glass in place and secure in each corner using a glue gun.
