

Forest and beach collage

v1828

A collage from a lovely trip to the beach or forest. A mixture of A-color Allround medium glue lacquer and sand form the base (within the frame) for the natural materials: some insects, pictures etc. First paint the frame using waterproof paint, f.ex. Plus Color. When the sand mixture dries, after 24 hours, it is strong and hard, so the child can easily put heavy stones, etc. into the mixture. This is an easy and fun outdoor activity for the youngest children and is ideal to show at kindergarten or nursery after a daytrip or excursion.

Comment faire

1 Make a mixture of sand, Allround medium glue lacquer and a small amount of water. Mix in paper cups.

2 Pour the sand mixture into the collage frame. You can paint the frame first if you wish. Put natural materials into the mixture. Add a couple of plastic insects as well as a photo of the child etc. Let it dry for 24 hours.
